

ZC Series Disc Feeder

Brief Introduction

ZC series disk feeder is an easy installation machine that is suitable for feeding mineral powder with sizes below 20mm. There are two types of this machine, named, open type and close type. With these type(open and closed) of machines, feeding quantity can be controlled properly by adjusting the position of scraper. The open type is suitable for dry and soft materials feeding, while the closed type is suitable for sticky ores with much mud and moisture feeding.

Remark

If you don't have the special requirements, we will supply the open-type product.

Main Technical Parameters

Model	Disc Dia. (mm)	Rotating Speed Of The Disk (r/min)	Max Feeding Size (mm)	Feeding Capacity (t/h)	Motor Model	Motor Power (kw)	Weight (kg)
ZC300	300	10	20	≤3.6	Y90S-6	0.75	115
ZC800	800	9	20	≤8.0	Y90L-6	1.1	195
ZC1000	1000	9	20	≤12	Y100L-6	1.5	263
ZC1200	1200	7	20	≤18	Y100L-6	1.5	500
ZC1500	1500	7	20	≤22	Y132S-6	3	755
ZC2000	2000	6	20	≤80	Y132S-4	5.5	1450
